

Plan for Winter 2024 Finals

Jerich Lee

November 30, 2024

So I have a lot to do this winter, but I honestly feel pretty good about it. ChatGPT will be my good friend and will be doing a lot of the heavy lifting for me, which is great. I spent a good amount of time in Boston just thinking and reflecting about this winter, and I feel pretty good about it. I am going to utilize the tool that I built this summer, Aeren. It's

basically just an interface for me to keep track of myself and other things, like tasks, food, and such. It's not really meant to be like an all-encompassing thing for *every* little detail in my life, but it's a good way for me to just stay on track while trying to balance so many things at once. I'm going to work hard this winter and make myself proud. Let's get this
